Macros work guide

Wow classic hunter guide macros. <https://www.dkpmius.com/wow/guides/vanilla-wow-druid-macros/>. Wow macros guide hunter. Ht tps //www.dkpmius.com/wow/guides/vanilla-wow-druid-macros/. Wow macros full guide. Wow druid macros guide. Wow macros guide warlock. Wow classic macros guide.

/Petmovo after using this command, you must specify the place where your pet will go after that. /Dominate; Battle /Cancelform /Fire Fire (Ferral) (); Fiembra Fire in the form of a bear or cat, this macro uses the Fire Fire spell (wild), in the form of a spell it is just a fairy fire. You can add "target" after any vasal unit id to select the objective of that unit. The parameters depend on the command, some commands do not require parameters, indoors - indoors. In our case, it is necessary to choose topics such as: repair work; services; electrician; plumbing and other narrow ones. In addition, publishing such ads increases the load of employees that have to explain to customers that this company cannot process an incoming order. Types of orientation To better understand how much it works, it must become familiar with the main types of orientation. There is an example of a macro that uses to select Shield Bash or Pummel depending on what he is using: #Show Shield Bash; Pummel /Cast Shield Bash; Defensive position; Pummel; Berserker score The #Show line is used to show a Shield Bash or Pummel icon. The next macro is an example of such a case. Predetermined objective command key Objective /objective /focus target /startack OBJECTIVE OBJECTIVE /PETATTACK PETTARGET OBJECTIVE 1.5. Conditional jumps now see the complete list of conditions and what they mean. Inflation (channeling) is not the same as the launch of regular spells. All options will be revealed in detail later. channeling 1.5.11. Visit a large number of sites dedicated to this topic to discover all the characteristics of the inter-product product for it. Then you could return to the target for a damage and activate the next macro when you need to re-apply your transformation into a sheep. At the highest level, it has a set of groups of criteria/parameters separated by semicolons. Specifications: /2 - Current active specification. To write a macro with it, it must be completely correct in the spelling, punctuation and space. It works at the beginning only for offensive spells. The entire script must be written in a line. For example: /Stopcasting /Cast Shadowburn disassembly forces you to disassemble. "None" - without unity. If not, go to the next condition. According to one of the previous examples, we can conclude that it is inappropriate for a company that operates in Krasnodar works with consumers from all over Russia. Geographically directed advertising can be divided into two separate categories: extended and local. The Macros 2 and 3 will be very important if possible. Note that we could use the condition in an equipment /cast, instead of separating it with Command /Stopmacro. "Raideptn" - Pet of the only member of the vent. Each of the conditions in turn will be discussed with more detail later in the guide. PET 1.5.14. 1.5.14. - Floating. This is the equivalent where n is the number of frame. Not experienced, the players were prepared in stages for the game in Sã, where they did not work and asked. Scripts The Wow interface is controlled by code that is written in the Lua command sequences language. If it is true, the control is transferred to the command /punish with the Flash Heal paragraph. The same verification of the friendship of the objective occurs here, but this time it determines whether the objective of its objective is friendly. Now the macro verifies the state. These shares include contacting the company, buying products, add products to the basket with the post-purchase itself or use services. In this case, the demonstration of ads 24 hours is inappropriate, since advertiser employees may not interact with their audience outside the work hours. To increase the effectiveness of this world, experts recommend identifying "hot hours." Each set of conditions is provided within the square supports. However, this does not apply to conditioning parasitications (described below). Can you imagine what was a public boom? Blizzard launched for the first time an update in which the main villain causes the plague Villano and he did not know how to stop the plague. As you can see in the previous simple examples, the command is executed from left to right. It allows you to choose the desired action depending on the active pet, and all include if they are true. You can also specify a name or unit of unity, then the pet will attack a specific unit. At the highest level, set sets of criteria/options separated by semi-olons. If the company can take orders and incoming calls at any time, the value is "24/7". In fact, depending on the implementation in particular, it is To do without facilitator /click. There is an illustration of the general syntax: /command [conditions] [more conditions]; [Conditions] Parameters ... General syntax options All commands of the console basically work in the same way. Remember that Target will assign the focus to whoever currently is your goal. Here is the pseudo code, as a transcription of what does the second line of the macro: if the shield is on and I am in the battle or the defensive posture, then /melting of the foundation shield of the contrary, if the Shield is equipped /defensive f setback posture otherwise, if I am in a Berserker posture, then /cast pummel otherwise /Berserker posture of Fundicio de Fundicion here there is another macro that gives Overpower his power: /equip a position of crystallized war war battle; Supervotation channeling: usually, if you unfounded a spell (that is, channel it) and start launching another, will interrupt the infusion process. This can be ostile for classes with buffs: /cast Arcane Brilliance; Arcane intellect If you are in a group, the macro will generally emit arcane brilliance. Once the focus objective is established, the destination ID can be used for all the commands. Some of the other variables and their predetermined conditions (with much less scope for use) are: AutoloottoGGLE (SHIFT) - Automatic collection elements Stickycamera (Ctrl) - Static Splitstack (SHIFT) - Splitting Stacks Pckpack (SHIFT) - ACCIN To choose UP Compaleitems (SHIFT) - compare OpenLBAOS (SHIFT) Condition, the option allows its macro to respond directly, depending on the mouse boton is used to activate the macro. Imagine that food for your He is always in the first slot of his backpack - it can be inventory slot, element type, element subtype. To do this, insert the spell and the message through /p in the macro: /polymorph /p sheep %d! Note: the macro begins all at once, so it will say its /just after starting the spell. It is possible that, using this tool, the advertiser has the opportunity to spend more effectively the budget for advertising campaign. In the field of marketing, "orientation" is one of the varieties of advertising techniques aimed at achieving the maximum efficiency. The basic syntax is as follows: Res = n/target/combat/shift/alt/ctrl where n is the number of seconds of inactivity after which the macro will be restored. The main advantage of this world is to attract only interested users. To obtain the maximum result of placing an ad, you must choose the right sites where the ad is placed. Demografica This marketing tool is often used when performing an advertising campaign on social networks. These do all differ only in the precise of the data determination. Without options, /Focus will assign its objective as a focus, and /Clearfocus will erase your approach. A comma is the same as "and". Help: You can launch friendly spells in the target dam) "The given boton is pressed (BTN): the macro activated with given mouse boton) "The specified enchantment is being channeled the action bar (bar): the pigin of the given action bar is selected bonusbar e a -, the specified bonus bar is an active pet: the specified pet is Available combat - in the swimming mounted in combat - in the water flying - ride a flying flying flying, in a spot where interior flying mounts are allowed, indoors in the open air, to the Free, the party, the objective is a member of your party vessel, the objective is a member of your group or group of raids, you are a member of the group specified the aid and the damage determines whether the objective exists. If the desired desired It is not yet found, the macro will move to the next condition . (The fanatic will be pleasantly baffled. For example, if you oriel will guide me and will be forced to point to Yriel. Alternate the skills the command /cast on some of the spells immediately . Now you can use a macro to turn a mafa into a sheep at the right time: /casts in scripts [focus] What are scripts for? The conditions can be specified in any order, but it is always taken into account First, before any other condition. The one that will be passed to the command if there is no objective. Blizzard provides many APIs used in the scripts to control the interface. The conditions in themselves are constructed from several blocks. Other cutting commands that we have covered the basic concepts and now I want to introduce other cutting commands. If we used with a a a ito the spell, the macro passes to the next. Below a list of

conditions, to better understand how this tool works, consider the practical example. Imagine a person who is washing machines on the Internet. The answer is simple. For example, if a life condition in something will or happen when it is not in combat, /swaptionbar 1 2 Cancel Buffs. The command /cancelation allows you to cancel unnecessary fans. If you want to transfer only macros, you must copy World of Warcraft \ WTF \ ACCOUNT \ ACCOUNTNAME \ MACROS-Cache.txt for General Macros and World of Warcraft \ WTF \ ACCOUND \ Yourname \ yourcharactername \ Macros-Cache. TXT for specific characters macros. The fourth line is necessary because /approach objective does not restore the objective if it does not have a focus set /approach 1, the fifth line will select its previous objective). In other words, if it does not have a goal, it will return false. And both return "true" if there is a goal to launch the spell. When choosing this guideline, it is very important to establish geographical parameters, otherwise, the advertising link will be shown to all people who comply with the previous criteria. In addition, there are some objectives that cannot be helped or damaged (players with pvp off, pets without combat, escort missions, etc.). Next, we propose to talk about a concept such as orientation and consider all its meanings. The orientation (of the English objective, the objective) is a set of all that segments users according to a series of indicators that the advertising technique is used considered. to maximize the participation of the objective public in the advertising campaign. For example, /Target Party1 will go to the first member of your group. Note: It was possible to remove the check and the macro would work almost in the same way. POST The macro behaves exactly as if you were only throwing a spell spell spell. People gave the amount to which they were dictated. Or the healer can establish the main tank of the raid as the focus. Raid: an objective in your group or vent. Then we propose to consider the principle of operation of this marketing tool. Principle that works to better understand the essence of orientation, one must consider practical examples. And will return at least if there is a goal. A couple of teams have "key objectives" as their main objectives for these teams. "Focus": The current player approach. Channel: - Maintain the specified spell. Insecure commands such as chat commands, emotes, they can be executed in Scripts LUA with the command /execute. In some cases, it is allowed to indicate neighboring cities and settlements located in this region. Address a selection selection Everything, and the concentration in a group that meets the temporary specified criteria this method is more appropriate to use in combination with contextual advertising. Saving a goal for future actions The command /focus allows you to keep your goal so that you can return to the latest. /cast renew; Word shadow; pain during the execution of this macro, the state is verified. The conditions in SA consist of some blocks. Let's combine two commands: /cast and /target; /target blackwing Mage /Cast Scourge of Agony if there is no aliving Blackwing magician nearby, then someone will go to someone with a name that begins with m or ma. If this is a friendly goal, then the macro loses its meaning completely. As a general rule, such ads are placed on those resources that belong to the same category as the advertiser's website. For example, your current objective can be selected using the "objective" unit ID. In addition, this time is often used by marketing specialists. With a complement such as Focusframe (, it will have a separate panel for a cure of more easily. Some of the conditions also require their own set of parameters. In the case of all advanced, the advertiser interacts with users of a specific region. equivalent to . An entrepreneur who wants to promote his Internet business must choose one of the exchanges where advertising will be purchased. When configuring the orientation, the geographical parameters are established first. A set of options begins with a colon ":" And each option is separated by a forward cut "/" which means "or". General syntax of macro options All cutting commands work with the same principle. If there is no one under the cursor or the objective is hostile, the macro will simply throw a flash of light if the option of in itself you are enabled. Suppress the autocasted variable names "if the modifier to launch spells automatically is enabled." By default, this is ALT (keeping the ALT key while throwing you will try to throw them yourself), although some of the accessories allow you to change this. Once you have assigned an approach, you can use it as a unit ID in other commands. The "virtual click" can generally be ignored, but if you are using a complement to modify the action bars, it can be useful. This is not discussed, but the situation can change in the future. The simplest macro looks like: /target vasya /target seeks coincidence between the letters he writes and the objectives around him. In my opinion, the generation is growing and the interests are changing now, it is not enough to only launch a "fireball" to someone. First, as you can see in the "Nodead" example, you can add "no" before the condition to obtain the opposite value. However, you can designate certain racks for which you want to verify. Therefore, you can make the following macro switch: /cast mind control /cancelation mind control All classes with pets should evaluate the usefulness of this option. The commands that allow options only "safe" commands respond to macro options. /Using this form allows you to use an element in a specific slot. Here there is a simple example of the use of Shield Bash's ability in defensive or battle positions; but if Berserker's posture is active, it changes to the defensive. If the condition is true, the word of the shadow is used; the pain is used. /targetemy is like pressing the tab, and /targetfriend is like ctrl-tab. /Focus /Stopmacro /Cast Polymorph The first line establishes the approach in its current objective (or restores the approach if there is no objective), depending on one of the following situations: it does not have a hostile approach (unless it is really friendly or not exists) your approach is dead, it holds a modifying boton (if you want to change the focus while you are already configured) Second line of the macro does not run if it has no focus. However, if it does not have an objective or it is impossible to launch friendly or offensive spells, you will receive an error message or, depending on depending The spell, a selection cursor of objectives. Imagine that you are a wizard and want to announce your group when you shear someone. Consider this macro: /petattack; For not initiated, it seems that I am sending a pet to an objective in the approach if it is hostile and nothing more. Keep in mind that in some cases you can do without. We use the following macro to change between them: /Equipset DfS; Tank if you have a shield in your hands, then you will use the DPS set, otherwise, the established tank. /Targetlasttarget, /targetlastfriend, /targetlastemy and the first command will highlight its previous objective. For example, the raid leader told him to make a quest to complement to a sheep. "Partypet" - the pet of the fare member of the party. Terms will now present the list of conditions and what they mean. Use articles and accessories. Everything is very simple. What are macros in the approach? She uses a list of spells and elements separated by commas. "Objective" restores the sequence when the objective changes, "combat", when he leaves the battle, "shift", "alt" and "ctrl", when he activates the macro with the corresponding key pressed. As the practice shows, only the great organizations that have a call center in their staff, which operates twenty-four hours a day, can use such configurations. "Mouseover", the unit that is (or was recently) under the mouse pointer. Comando /target clear, but exactly the same behaves. Using normal macros, spell spears in your current goal. Again, for the sake of clarity, a key objective is one in which it can be used and will allow the team for a more objective. It will mean "any of the racks, except 1 or 2" empty parameters, confusion arises when commands are used that do not require parameters. Analysis of the question: Objective: which is in simple words, we can conclude that this tool Obligate the interested user to take a specific specifier. These slot pages apply to the lower action bar Izquierda visible en la predetermined interfaz. YO EMPZEARE EMPITAZARE What you can't do with scripts. The simplest form means that it is found in any of the positions. The simplest use of the focus is to use it with keyboard shortcuts. Otherwise, an objective cannot be verified or unable to launch a ostile spell in the objective), the following condition is verified. In fact, safe commands are the reason for which the options arose. The cities extinguished and only strengths remained. This world is used by placing banner links through special sites. But we divide the macro into its components: /petattack; \ / \ / V V V | | | | Command options | | Parameters (empty) | | Options (empty) | Parameters (empty) Do you spend the additional set of options and empty parameters? Help: You can launch a a Etil spell on the goal. However, this link does not take advantage of the approach. But what do you now? The orientation allows you to show advertisements to the target public, which leads to an increase in the effectiveness of the advertising message. There are several ways to remember an objective. The most common error when writing a macro is to add an additional semicolon at the end, which leads to unexpected technical problems. Suppose you want to include in a macro so that during normal use a spell performs, and when the modifier button is
pressed, another: /cast Flash Heal; Greater cure, of course, the modifier boton can be specified specifically, for example, it means "change or control." Any instant spell or not GCD can be followed by another. PET: The specified pet is active. Sample someone for the bust. The combination of the commands /cast and /target allows you to change the objective when clicking on the macro. As a general rule, the world in consideration is used by those members that attend the applications received from customers only The business schedule. It is often used to prevent a macro from being classified automatically (healing wave of melting). Empty conditions must sometimes launch a spell in a specific objective under certain conditions, but for the magic to function normally if these conditions are not met. There is where Blizzard gained. Since there are no conditions here, it will always be true, which will make Flash Heal throw in the player himself. This nuance requires a specific example: approach objective here, the "key objective" is the focus. If before that you did not have an objective, then the team will do nothing. Modifier: SHIFT/CTRL/ALT or MOD: SHIFT/CTRL/ALT - holding the specified boton. Commands Support options command list that support options: #Show #SHOWooltip /Town Hall /Cancela /Cane Petautocastoff /Petautocaston /Petdefensive /Petfollow /Petpassive /Petfocus /Startattack /Stopattack /Stopcasting /Stopmacro /Swaptionbar /Target /Targetemy /Targetfriend /Targetstart /Targetparty The macro options system allows us to establish the objective of many actions. For example, when a priest controls the mind of an objective, the action bar uses the "bonus" bar * # 5. But this is a great risk to neighbors, you have to rebuild everything, but it is worth it. Specifically, Blizzard did not want to confuse people who used the point and coma " , " in the chat. This means that if you put these commands in a different order, the effect will be the same. If you want to use a macro and not immediately turn off these skills, place an exclamation sign in front of the name of the spell. This macro will throw a flash of light on the target under the mouse cursor. Macro options are a way to control macros actions based on various information. To take a gun to a slide slot: /equip the ABISAL ax To equip an accessory in the lower slot: /Equiplot 14 Carrot on a stick, imagine that we have kept two sets of things: stuff. Bar 1.5.13. The team works from left to right. /targetemy /targetemy 1 /targetfriend /targetfriend 1 /targetenemyplayer, /targetfriendplayer these teams take turns to go to a particular type of player's carcter. Botonic numbers 1 to 5 correspond to the left, right or medium buttons, and buttons 4 and 5 (if your mouse has one). Note: You can only use these commands once per macro. This company operates only in the city of Tver. An example of use would be aspects of a hunter. If the State is true, then the renewal spell is executed and the macro continues to the next line. The point and coma is treated as "more" (otherwise) or "otherwise if" (otherwise if). Party: The goal in your group. In our case, the users of these services are women of twenty years old or more. In conclusion, thematic configurations are established. If you want to use options for macros with insecure commands, there are accessories that provide this option. "Pet" is the current player of the player. To give an immediate example, the next macro will renew a friendly goal and a word of shadow: pain in a hostile one. If the command /say could use options for macros, the following example would print only "hello" : /greet; I am a rookie here there is a list of all the safe commands available in wow: #SHOW * #SHOWooltip * /assistance /cancellation /cancercform /cast /castrandom /castequence /changeactionbar /Clearfocus /Cleartarget /Click /Disassembly /Equipment + /Equipslot + + /focus /petargessive /petattack /petautocastoff /petautocaston /petautocastoggle /petdefensive /petfollow /petpassive /petstay /startattack /stopattack /stopcasting /stopmacro /swaptionbar /target /targetemy /targetextact /targetfriend /targetlastemy /targetlastfriend /targetlasttarget /targetparty /targetraid / USERANDOM * #SHOW AND #SHOWOOLTIP ARE NOT "REALLY SAFE COMMANDS, BUT BUT in macro options such as /use and /execute. Applications first, remember the objective, so you must now explain how the macros work. If change or what is established there (ctrl or alt), then the capacity will apply to the approach (to the memorized objective), if the change is not pressed, then the capacity will apply to the objective. Then they will analyze each of them with more detail. For example: /Cancelaura Horn of Winter /Cast Horn of Winter /Cast form with the exception of warriors, any kind with postures (Druids, shadow -shaped priests, pácaros with stealth, etc.) You can exchange the shield and out of hand with the following macro: /Equiplot 17 Mists of Gladiators /Clear 17 SH A comb "ta sequence of spells and elements often there are cases in which the same sequence of spells often uses (for example, opens a rotation), and vice versa. Example, the druid forms that begin with Bear, Aqua Form, Cat and Travel Form will have posture number 1 to 4. Once you find a set of conditions that is true, the command is executed with the paragraphs Appropriate meters. Often people put a point and coma at the end of a macro, which leads to some unexpected mistakes. There are two mounted access keys associated with the approach, the objective and restoration objective are remembered. Here is the same as, and it is possible to use conditions such as verifying whether in rack 3 or not shelves. To start, point to the mafia and the type /approach. "Player": the player himself. Who is it interesting to play AND knowing that everyone can do this. Fortunadamente E, you can make macros that correspond to different actions of Action Car and collaborate them in other panels. How can a ppear to the horns among readers, which, since the horn does not Other positions, this option works in an ideal way, it is also applied to the Shadowmeld Racial Night Night Elves, Mage's invisibility, etc. Group: party/vent are in the specified group type. And so, first of all, I must tell you that instead of changing, you can put ctrl or alt in a @ 1, then I will understand what I mean. People who enter, play and leave. But even then, it will be quite brutal: /launch a greater cure /cast melting of the flash /renewal of melting, but if we use the main macro to select the objective, depending on the bottle of the pressed mouse and two macros that select spells by buttons Modifiers, we can simplify the understanding of the macro. Imagine a company that provides the "husband for an hour" service. I cannot tell you all the ins and outs of the command sequences, so I will give you my favorite guide as an example. A case of common use is to establish an objective for the control of the crowd. It was a bomb. Each of the following world has its own characteristics. /Use You can use any article of your quest a little hungry for him to want more. Previously, everything required what the work of the head or something and people enjoyed it. The text of this announcement contains contact information for comments. You can change the shield and out of hand with the following macro: /Equiplot 17 Mists of Gladiators /Clear 17 SH A comb "ta sequence of spells and elements often there are cases in which the same sequence of spells often uses (for example, opens a rotation), and vice versa. Example, the druid forms that begin with Bear, Aqua Form, Cat and Travel Form will have posture number 1 to 4. Once you find a set of conditions that is true, the command is executed with the paragraphs Appropriate meters.
